## Freeport, TX Texas Operations Site - Plant A Fenceline Monitoring Program Civil Action No. 2:21-cv-114

Sampling Period ∆C *	0.16	μg/m³
Annual Average ∆C **	NA	μg/m³

\* Sampling Period  $\Delta C$  = Difference between the highest and lowest concentrations detected during the sampling period

\*\* Annual Average ΔC = The rolling average of the 26 previous 14 day sampling periods. This will be calculated after data from 26 sampling periods are available.

J = Estimated value - The analyte was detected between the Method Detection Limit and Reporting Limit

ND: The analyte was not detected
