Sampling Period ΔC *	40.1	μg/m ³
Annual Average ΔC **	NA	μg/m³

^{*} Sampling Period ΔC = Difference between the highest and lowest concentrations detected during the sampling period

^{**} Annual Average ΔC = The rolling average of the 26 previous 14 day sampling periods. This will be calculated after data from 26 sampling periods are available.

J = Estimated value - The analyte was detected between the method dection limit and the reporting limit

M = Tube was not received by the laboratory
