

**Louisiana Operations Community Advisory Panel (CAP) Meeting
November 8, 2012
Meeting Summary**

Attendees:

CAP Members:

Matt Jewel
Gary Spillman
Melvin Lodge
Riley "Pee Wee" Berthelot
David Ogwyn
Lucky Songy (in place of Mitchell Ourso)

Dow Employees:

Eduardo Do Val, Site Leader
Stacey Chiasson, Public Affairs Leader
Christine Baldrige, Regulatory Services Leader
Fran Comeaux, Public Affairs Staff

Site Leader Eduardo Do Val discussed Dow's 3rd Quarter earnings. The shale gas growth projects on the US Gulf Coast announced in April 2011 are still a priority for the company and will continue to move forward.

Stacey Chiasson introduced Regulatory Services Leader Christine Baldrige who will attend the CAP meetings to provide the group with any updates on the implementation of the Plaquemine ground water remediation. Baldrige reported the following information to members of the CAP:

- Dow continues to conduct groundwater sampling in accordance with the approved MNA Plan. In August 2012, Dow conducted the Third Quarter 2012 sampling event and collected samples from the Sentinel Well System
- All new MNA monitoring wells have been installed in accordance with the approved Monitoring Well Installation Work Plan.
- On October 30, 2012, Dow submitted its progress report for the Third Quarter 2012 to the agencies; you are being provided a copy of this submittal today.
- Copies of all submissions by Dow to the agencies under the Cooperative Agreement are placed at the Iberville Parish library per the Community Relations Plan.

Eduardo Do Val followed up with the comment that the site remained on track to have another "best ever" year in safety performance.
